Proposal for Client

Prepared on 23 September 2026

English

Overview

LiveAs Technologies is a software development company based in Kollam, specializing in customized software solutions. We propose to build a web application tailored to your business requirements.

Client Requirements

- **Target Industry:** HVAC company.
- **User Roles:**
- **Admin:** Needs a dashboard with previews, and the ability to add, edit, and delete staff.
- **Staff:** Five staff members who log in to handle assigned tasks.
- **Customer Features:**
- Log in using a phone number.
- View and manage bills using a unique bill number.
- Raise a service request, which generates a unique service token.
- **System Features:**
- **Admin:** Ability to assign service requests to staff, add products and product categories, and create, add, and delete bills.
- **Service Requests:** Once a service request is completed, it must be generated as a PDF and sent via email.
- **AI Chatbot:** An AI chatbot integrated into the application to handle basic customer queries and provide solutions, functioning as a service center.

Proposed Solution

A customized web application built to manage the HVAC business operations. The solution will include a dual-interface system (Admin and Staff), a customer-facing portal, and an AI chatbot module.

Scope of Work

- Develop the web application.
- Build the Admin and Staff login interfaces.
- Implement the customer-facing portal with phone-number-based login.
- Integrate bill management with unique bill numbers.
- Develop the service request module with unique token generation and PDF email generation.
- Build the product and category management system for the admin.
- Integrate an AI chatbot for customer support.
- Provide a server solution.

Timeline

Not discussed in this meeting — to be confirmed with the client.

Pricing

The estimated cost for the proposal is approximately ₹1.5 lakh rupees. This estimate is for the software development. Server costs are separate. We are currently offering an annual 4K package for the server, along with service packages priced at ₹5,000 and ₹15,000.

Next Steps

We will prepare a detailed proposal based on the discussed requirements and send it to you. We look forward to hearing from you after you have discussed the details with your team.
