Proposal for ignou

Prepared on 28 September 2026

DOCUMENT Business Proposal	**CLIENT** ignou

Overview

This proposal addresses the administrative and operational requirements of a Regional Center of IGNOU for managing student admissions, assignments, examinations, and re-registration. The scope covers the submission and payment deadlines for semester-based, yearly-based, MBA, and PGDST programs, as well as the specific submission protocols for MBA students.

Client Requirements

- No confirmed BOS-supported customer requirements were identified.

Variations in Schema

- Students must submit their assignments before 30 September.
- Students must pay the examination fee before 30 September.
- Students must select their examination center carefully as changes are not permissible after selection.
- Students must mention their enrollment number, program name, and mobile number in all communications with the university.
- Students must submit a No Objection Certificate (NOC) from the new Regional Center if they wish to change their study center.
- Students must not share their login credentials for the student portal with others.
- Students must log in to the LMS portal to submit assignments for online programs.
- Students must read the project guidelines carefully when a project component is introduced in their semester.
- MBA students must submit their assignments to the Regional Center, Trivandrum (Study Center Code 4000) before 30 October.
- Students must verify their personal details on the website and inform the regional director of any errors.
- Students must re-register for the next semester or year by paying the fee, regardless of whether they have completed the previous one or written the examinations.
- Students must complete the re-registration process to avoid losing their admission for 6 months to 1 year based on the delay.
- Students must use their enrollment number instead of their application control number for further queries and communications with the university office.

Proposed Solution

The proposed solution focuses on automating and streamlining the manual administrative processes currently managed by the Regional Center. This includes digitizing the assignment submission workflow, implementing automated fee payment tracking, and creating a centralized portal for examination registration. The system will enforce strict deadline tracking for different program types and automate the routing of physical assignments to the designated Regional Center, Trivandrum.

Scope of Work

- The implementation will cover the development of a portal to manage student assignments, specifically ensuring they are routed to the Regional Center, Trivandrum. The scope includes tracking the specific deadlines for semester-based, yearly-based, MBA, and PGDST programs. It also covers the management of practical examination fees, which are ₹300 for courses with more than four credits and ₹500 for four-credit courses. The system will track the December 2026 term examination cycle, including hall ticket release on 15 November 2025.

Business Cost & Efficiency Impact

A regional center of IGNOU (Indira Gandhi National Open University) conducting induction meetings to inform students about admission, assignment submission, terminal examinations, re-registration, and study center policies for semester-based and yearly-based programs.

Business Area	Current Driver	Automation Opportunity	Impact / Measurement
Examination Registration	Manual selection of examination centers without foresight leading to invalid change requests.	Implement an automated system that uses student location data (e.g., registered address, IP geolocation) to suggest optimal examination centers and display a warning if the student's future travel plans indicate a high risk of needing a change.	Illustrative scenario If 100 change requests were received and 20 were valid, the invalid requests would be 80. (100 - 20 = 80). Measure: Number of invalid examination center change requests per session Assumption: The number of invalid change requests is not provided in the meeting. A calculation cannot be performed without this data.
Assignment Submission (ODL)	Manual physical submission of assignments leading to incomplete or incorrect submissions.	Deploy an automated assignment submission portal with mandatory file-size checks, PDF validation, and a pre-submission checklist to ensure all required pages and documents are attached.	Illustrative scenario If 500 assignments were submitted and 50 were incomplete, the rate would be 10%. (50 / 500 * 100 = 10). Measure: Percentage of incomplete assignments requiring manual correction Assumption: The meeting notes the occurrence of incomplete assignments but does not provide a volume or percentage.
Re-registration	Manual tracking of re-registration deadlines leading to students losing admission and revenue leakage.	Implement an automated re-registration reminder system (SMS/Email) that triggers 30, 15, and 7 days before the deadline and locks out late registrations.	Illustrative scenario If 1,000 students missed the deadline, the lost admissions would be 1,000. (1,000 = 1,000). Measure: Number of students losing admission due to missed re-registration deadlines Assumption: The meeting states that missing the deadline results in losing admission for 6 months to 1 year, but does not provide a count of affected students.
Study Center Change	Manual processing of study center change requests requiring physical NOC submission.	Create an online portal for study center changes where students upload the NOC and the system automatically validates the new center's program availability, reducing manual processing time.	Illustrative scenario If 100 requests were processed in 500 days, the average time would be 5 days. (500 / 100 = 5). Measure: Average time to process a study center change request Assumption: The meeting mentions the manual process but does not provide data on processing times or request volumes.
Fee Payment (Practical)	Manual payment of practical fees leading to missed deadlines and delayed practical examinations.	Automate the practical fee payment process by integrating it with the assignment submission portal, sending automated reminders, and allowing online payment of both theory and practical fees in a single session.	Illustrative scenario If 100 students paid on average 20 days after the link opened, the sum would be 2000. (100 * 20 = 2000). Measure: Average time taken to pay practical fees after assignment submission Assumption: The meeting mentions the deadline but does not provide data on payment times

			or volumes.

Client data required to replace illustrative assumptions: Total number of students; Number of invalid examination center change requests; Number of incomplete assignments; Number of students who missed re-registration deadlines; Average processing time for study center changes; Average time taken to pay practical fees; Cost per manual correction or administrative hour

Timeline

Hall tickets for the November 2025 examinations will be released on 15 November.

Term examinations for December 2026 will be held starting in November 2025 and ending by half of January.

Assignment submission deadline for semester-based programs is 30 September, but may be extended to 30 October.

Examination fee payment deadline for semester-based programs is 30 September.

Practical examination fee payment deadline is 30 November.

Assignment submission deadline for yearly-based programs is 31 March 2027.

Examination fee payment deadline for yearly-based programs is 31 March 2027.

Assignment submission deadline for MBA programs is 30 October.

Examination fee payment deadline for MBA programs is 30 September.

Assignment submission deadline for PGDST (PG Diploma in Statistics) is 31 March 2027.

MBA students must submit their assignments before 30 October.

Students admitted in July 2026 for semester programs can write the exam in December 2026 or June 2027.

Students must register for the next semester or year by paying the fee, regardless of whether they have completed the previous one or written the examinations.

Pricing

Practical examination fee is ₹300 for credit courses with more than four credits, and ₹500 for four credits.

MBA students must submit their assignments to the Regional Center, Trivandrum (Study Center Code 4000).

Next Steps

- We will initiate a discovery phase to finalize the technical specifications and implementation schedule for the proposed system.
